Ahmed Ibrahim

Full Stack (MERN) Web Developer

Elobour City, Cairo, Egypt • 01501158003 / 01040100788 • ahmedibrahimhassan654@gmail.com • linkedin.com/in/ahmed-ibrahim5588 • github.com/ahmedibrahimhassan654 • portfolio-gules-two-d8kt6mg2gz.vercel.app

PROFESSIONAL SUMMARY

Full-Stack MERN Developer with 5+ years of experience designing and deploying scalable, end-to-end web applications, combined with hands-on Linux System Administration and AWS cloud deployment. Proficient in MongoDB, Express.js, React.js, and Node.js, with strong command of Next.js, Tailwind CSS, and Material UI. Now engineering production-ready, full-stack applications enhanced with practical AI features such as intelligent AI chatbots and automated content/review summarizers.

I specialize in crafting robust, scalable, and intelligent web applications tailored to meet business goals. My core expertise combines Node.js, Express.js, MongoDB, and modern frontend frameworks like React.js with cutting-edge Generative AI integration to deliver end-to-end solutions that elevate user experiences and drive results.

Core Skills & Keywords

- **Practical AI Solutions:** Working with Large Language Models (LLMs), prompt engineering, token management, and running open-source models locally using Ollama and Hugging Face.
- **Expert Technical Skills:** Proficient in JavaScript, TypeScript, React.js, Node.js, Prisma, REST APIs, and Real-Time Applications (Socket.io).
- **Modern Frontend:** Building intuitive designs using Tailwind CSS, shadcn/ui, and responsive web practices.
- **Secure & Scalable Backend:** Implementing secure coding practices, reliable REST APIs, JWT/OAuth authentication, role-based access control, and efficient data management with MongoDB sharding.
- **DevOps & Infrastructure:** Linux (CentOS/RedHat) administration, AWS EC2 deployment, PM2 process management, Nginx reverse proxy.

SKILLS

Front End	React.js, Next.js, TypeScript, Responsive Web Design, Material UI, Tailwind CSS, shadcn/ui, Deploy to AWS
Backend	Node.js, Express.js, Bun, MongoDB, REST APIs, JWT & OAuth, Socket.IO, Postman, Role-Based Access, Prisma ORM
AI & Machine Learning	LLMs & Prompt Engineering, Generative AI Integration, Local Model Integration (Ollama), Hugging Face Models, AI Chatbots, Content Summarization
System Admin	Linux (CentOS/RedHat), Networking, Virtualization, AWS EC2, PM2, Nginx

WORK EXPERIENCE

NANSC — National Air Navigation Service Company Cairo, Egypt • 08/2024 – Present

Linux System Administrator — Radar Systems (Full-time)

- Administered mission-critical Linux servers (CentOS/RedHat) supporting real-time radar surveillance platforms (SDPS) with high availability and disaster recovery standards.
- Monitored system security, uptime, and performance across critical radar computing units, proactively applying patches and hardening.
- Collaborated with radar and air traffic control teams to integrate Linux servers with surveillance sensors (PSR, SSR, ADS-B, MLAT, Mode-S).
- Diagnosed and resolved system-level incidents and documented operational procedures aligned with aviation safety standards.

Start-Tech Remote • 12/2024 – 06/2025

Customer-centric tech startup delivering measurable, effective solutions.

Node.js Backend Developer (Contractor)

- Engineered real-time chat architecture using Socket.IO, Express.js, and MongoDB, maintaining active WebSocket connections with low latency.
- Deployed the application to an AWS EC2 production Linux server using PM2 process management for continuous uptime.
- Partnered with the client-side mobile developer to define and align REST API contracts and data models.

Front End Developer (Next.js + TypeScript) (Contractor)

- Developed a customized Next.js (TypeScript) admin dashboard integrated with a backend REST API, streamlining internal workflow management.
- Engineered a responsive, modular UI with Tailwind CSS, ensuring cross-device compatibility and modern design standards.
- Collaborated with backend developers to integrate dynamic data, optimize frontend performance, and maintain clean component architecture.
- Deployed the application to a production Linux environment using PM2, ensuring stable, continuous uptime.

Dcentrify Remote — Beirut, Lebanon • 05/2024 – 01/2025

Digital agency providing custom web/app development and digital marketing.

Node.js Backend Developer (Part-time)

- Architected a modular, secure backend with Node.js, Express.js, and MongoDB for a dynamic car rental platform.
- Implemented core features including rental scheduling, dynamic pricing calculations, driver-client roles, and admin commission handling.
- Hardened API security through authentication, authorization, and input sanitization, while ensuring scalability and data validation.
- Delivered fully documented RESTful APIs, enabling smooth integration with frontend and mobile teams.

Node.js Backend Developer — Multi-Vendor Ecommerce (Part-time)

- Developed and maintained high-performance server-side applications using Node.js and Express.
- Built an automotive listings platform with advanced filtering and search capabilities.
- Designed and implemented secure, validated APIs for an Ecommerce application (similar to Dubizzle).

Freelance Remote • Part-time

MERN Full Stack Web Developer

- Designed and developed a full-stack ticketing platform using Next.js, Node.js, Express, and MongoDB, enabling real-time issue tracking across departments.
- Implemented role-based access control (RBAC) for admins, managers, and employees to manage ticket creation, assignment, and resolution workflows.
- Built dynamic frontend interfaces with React (Next.js) and Tailwind CSS, ensuring responsive UI/UX for internal users.
- Created secure RESTful APIs with Express.js, including ticket status updates, notifications, and department-based filtering.
- Deployed the application to a fast cloud environment (Netlify) with environment-based configuration and JWT/cookie authentication.

EDUCATION

Bachelor of Engineering in Electronics & Communication El Shorouk Academy • 01/2007 – 12/2012

Five-year program focused on the conceptualization, design, and development of electronic, computer, and communication products, systems, services, and processes.

PROJECTS

AI Chat Bot *Full-Stack AI-Powered Chat Application* github.com/ahmedibrahimhassan654/ai-chat-bot

A full-stack AI chat application with real-time streaming responses, local LLM integration via Ollama, and modern tooling (Bun, Prisma, shadcn/ui). Features intelligent conversation handling, context awareness, and a clean, responsive UI.

Stack: React, Bun, Prisma, Ollama, shadcn/ui, Tailwind CSS

Architecture: Bun runtime, Prisma ORM with PostgreSQL, Local LLM inference via Ollama, shadcn/ui with Tailwind CSS

BeirutMart *Multi-Vendor Ecommerce Platform* beirutmart.com

Multi-vendor Ecommerce marketplace with vendor onboarding, product catalogs, advanced search, secure checkout, and validated APIs.

Stack: Next.js, Node.js, MongoDB, REST API

Deployment: AWS EC2, PM2 process management, Nginx reverse proxy, environment-variable configuration

Ezo App *Transportation Car Rental Platform* ezo-app.netlify.app

Transportation and car booking platform available on web and mobile, with booking flows, driver-client roles, and real-time tracking.

Stack: React, Node.js, Express, MongoDB

Deployment: AWS EC2, PM2 process management, Nginx reverse proxy, environment-variable configuration

EduCenter *School Management System* educenter-frontend.vercel.app

School management system with role-based dashboards for administrators, teachers, and students, covering attendance, grades, and scheduling.

Stack: React, Node.js, Express, MongoDB

Deployment: AWS EC2, PM2 process management, Nginx reverse proxy, environment-variable configuration

Sky Line *Car Rental Platform* skylinerental.net

Car rental system featuring rental scheduling, dynamic pricing calculations, and an admin dashboard for fleet and commission management.

Stack: React, Express, MongoDB, AWS

Deployment: AWS EC2, PM2 process management, Nginx reverse proxy, environment-variable configuration

YouTube Clone *Video Streaming UI* youtubeclonebyahmedev.netlify.app

Responsive video streaming interface focused on layout, performance, and a clean, reusable component architecture.

Stack: React, Tailwind CSS, Netlify

Deployment: Netlify
