<https://ahmedwebdev.netlify.app/>

Results-driven **Full-Stack MERN Developer** with over 5 years of experience designing and deploying robust, end-to-end web applications. Proficient in **MongoDB, Express.js, React.js, and Node.js**, with a deep understanding of both client-side experiences and server-side architecture. Adept at translating business requirements into scalable systems, with a portfolio of real-world projects including **transportation booking platforms, car rental systems, multivendor Ecommerce web app , a car rental platform and many more projects .**

Strong command of **frontend development** using **React.js, Next.js, Tailwind CSS**, and **material UI** , focusing on responsive, intuitive, and accessible user interfaces. Equally skilled in **backend development**, implementing RESTful APIs, authentication (JWT, social login), role-based permissions, and **MongoDB sharding** for high scalability.

Experienced in **Linux** Operating system, **AWS EC2 deployment**, and **server optimization**. Passionate about building real-world solutions with clean code, performance-first thinking, and a business-oriented mindset. Collaborative, self-managed, and always ready to take ownership of a project from idea to production.

Work Experience

NANSC

Egypt Cairo • 08/2024 - Present

National air navigation service company

Linux System Administrator – Radar Systems

Full-time

Skills

Front End

- React Js
- Next.js
- Responsive Designer
- Material ui
- Tailwind
- Deploy to AWS

Backend Development

- Node Js
- Express Js
- Mongo Db
- postman For testing
- Deploy to AWS

System Admin

- Linux
- Networking
- Virtualization

Education

Bachelor's degree in Electronics and Communication Engineering

El Shorouk Academy

GPA: Master

01/2007 - 12/2012

Five years college program that focus on the conceptualization, design, and development of electronic, computer and communication products, systems, services and processes.

- Administered and maintained Linux-based systems (CentOS/RedHat) supporting radar surveillance platforms and real-time air navigation infrastructure.
- Ensured system security, uptime, and performance for critical radar computing units (SDPS), with a focus on redundancy and disaster recovery.
- Collaborated with radar and air traffic teams to integrate Linux servers with surveillance sensors (PSR, SSR, ADS-B, MLAT, Mode S).
- Diagnosed and resolved system-level issues, implemented patches, and documented procedures in line with aviation safety standards.

MERN Full Stack Web Developer

Part-time

- Designed and developed a full-stack ticketing platform using **Next.js, Node.js, Express, and MongoDB**, enabling real-time issue tracking across departments.
 - Implemented **role-based access control (RBAC)** for admins, managers, and employees to manage ticket creation, assignment, and resolution workflows.
 - Built dynamic frontend interfaces with **React (Next.js)** and **Tailwind CSS**, ensuring responsive UI/UX for internal users.
 - Created secure RESTful APIs with Express.js, including ticket status updates, notifications, and department-based filtering.
 - Deployed the app Free and speed cloud environment (netlify)with **environment-based configuration** and **authentication using JWT and cookies**.
- Check The Production **Production app**

Start-Tech

Remotely • 12/2024 - 06/2025

StarT Tech is a customer centric tech startup, concentrating on generating results via measurable and effective solutions

Node Js Backend developer

Contractor

- Create server-side logic for chat apps using socket .io with Express.js and Mongo Db
- Deploy the app to an Aws ec2 production Linux server with a Pm2 package
- cooperate with the client-side mobile app developer

Front End Developer (Next js +type script)

Contractor

- Developed a customized **Next.js (TypeScript)** admin dashboard integrated with a backend REST API, enabling efficient management of internal workflows.
- Engineered a **responsive and modular UI** using **Tailwind CSS**, ensuring cross-device compatibility and modern design standards.
- Collaborated with backend developers to integrate dynamic data, optimize frontend performance, and maintain clean component architecture.
- Deployed the application to a **production Linux environment** using **PM2** for process management, ensuring stable and continuous uptime.

Dcentrify

Remote – Beirut Governorate, Lebanon • 05/2024 - 01/2025

Dcentrify is a digital agency that provides customized solutions in web/app development and digital marketing

Node.js Backend Developer

Part-time

- Designed and developed a **modular and secure backend architecture** using **Node.js, Express.js, and MongoDB**, tailored to the business logic of a dynamic car rental platform.
- Implemented core features including **rental scheduling, pricing calculations, driver-client roles**, and admin commission handling.
- Ensured system **scalability, data validation, and API security**, applying best practices for authentication, authorization, and input sanitization.
- Delivered fully **documented RESTful APIs**, enabling smooth integration with the frontend and mobile teams for a complete user experience.

Node js Back End developer (Multi Vendor ecommerce web app app)

Part-time

- developed and maintained high-performance server-side applications using Node.js and Express.
- Automotive Listings Platform: Developed a platform for managing automotive listings with advanced filtering and search capabilities
- API Integration for E-commerce (Similar to Dubizel): Designed and implemented APIs for an e-commerce application, ensuring robust security and data validation.

My experience in backend development, collaboration, and deployment has enabled me to deliver high-quality solutions that meet business requirements and exceed user expectations.
